Speed Queen®

THE BEST IN CLASS JUST GOT **BETTER.**

100 years. It's a long time for any company to be at the forefront of an industry. And you'd think that a company that's been able to lead for that long must have a finely honed craft — a premier product. Well, you'd be right. For more than a century, Speed Queen has built a legacy on providing equipment that stands up to any commercial laundry challenge. We make no compromises in performance. We refuse to be outdone in reliability and efficiency. Our commitment to quality is only matched by our commitment to your success. The result? The most profitable machines in the industry — bar none.

Some of our competitors may think that a residential machine wrapped in a rugged exterior passes for commercial grade. We believe that strength comes from within. Speed Queen machines are built specifically for the commercial environment. We use metal where others use plastic. Our world-class Test Lab rigorously pushes our products far beyond the conditions they'll face in the field. We believe in being there when our customers need us most. And we go the extra mile at every point of our manufacturing process to ensure that our machines reflect that belief.

For commercial laundry equipment designed for use in fire departments, health care facilities, hotels, correctional facilities, spas, salons, athletics organizations or another industry application, you can rely on the proven performance of Speed Queen to make your life simpler and more productive.

Made in America and refined for more than a century, Speed Queen Laundry equipment represents a secure investment for your on-premises laundry facility.

DEDICATED TO A HIGHER STANDARD

Speed Queen E-Mech washers and dryers are designed for durability and ease of use with push to start switch and reinforced control knobs and they come with a 3-year warranty on any part of the entire machine.

TOPLOAD WASHER

- Water level selectors give managers the flexibility to choose wash and rinse levels
- Extra-large capacity wash tub in stainless steel or porcelain
- Commercial quality transmission offers highest quality and durability
- Advanced suspension system eliminates the possibility of an unbalanced load issue

DRYER AND STACK DRYER

- Extra-large capacity with the largest door opening in the industry
- Front access for easy serviceability
- Stack unit offers two dryers in floor space of one

E MECH CONTROL

The E Mech control for washers and dryers offers customers a straight-forward design with simple temperature and fabric selections and includes indicator lights to keep customers aware of what cycle the machines are in.
